Description:

The governance of knowledge seems to be the Scientific Policy most able to creating value with regard of human and its evolution in cultures and civilizations. The duty of good governance is a consideration of the transfer of knowledge related to scientific and technological progress. Intrinsically, this process requires a system of knowledge organization and its management by implementing knowledge production and its influence in society.

In the present case, rely across all paradigms, know-how and specific knowledge to scientific disciplines and especially those in Humanities and Social Sciences, allows finding a dynamic of Knowledge Organization for dissemination, sharing and enhancement of knowledge. This new transdisciplinary orientation allows including concepts, tools and singular perspectives in the digital field and information technology.

With this new focus on the Knowledge Organization from the perspective of "Digital Humanities", the objective of the ISKO-Maghreb Chapter is to contribute in understanding the factors that organize knowledge and phenomena that affect the information society. Actions to be undertaken by the ISKO society must take into account socio-cultural, cognitive and economic in the strategic management of knowledge. Towards the knowledge society in line with the Digital Humanities, it should be seen in its dynamic, its content and its interaction with science, technology and transdisciplinary associated to universities, companies and politics.

In this new context "Digital Humanities" related to aspects of the "Knowledge Organization" and modalities of its management", a first orientation is pedagogical trying to answer the question "What is known about the knowledge and its organization in the context of Digital Humanities?". Then the question is evolving towards societal issues of knowledge, researches and applications, to provide clarifications towards the convergence of approaches and practices for the common use of digital platforms. Education, science, culture, communication and technology remain the major themes covered by ISKO Maghreb, for the development of the knowledge organization, collective intelligence and the perspective of the Digital Humanities.

In a friendly atmosphere, hospitality and open to exchange, the international symposium ISKO-Maghreb was thought to enhance the Scientific Society "ISKO" with the universities, the practitioners in the Maghreb countries and the world.

Program days:

- 1 – Plenary Lectures:** a plenary lecture by a half-day by guest speakers who are experts in their field. The objective is to present a current theme that concerns the scientific ISKO Society.
- 2 – Parallel thematic sessions:** twelve sessions of oral presentations of the best research selected by the scientific committee. After each plenary session, three parallel sessions are scheduled.
- 3 – General Meeting of the chapter ISKO-Maghreb:** (i) Board meeting, Board Directors and members of the Chapter ISKO-Maghreb. (ii) Opening to new membership in ISKO-Maghreb and establishment of Maghreb working groups. (iii) Future Symposium ISKO-Maghreb.

Topics:

ISKO-Maghreb chapter asks authors to develop theoretical and practical dimensions in their scientific proposals to address issues relating to knowledge organization, knowledge management and collective intelligence from the perspective of "Digital Humanities":

1– Digital Document

- a. Effects of dematerialization: the digital for the knowledge and expertise
- b. Communication and media convergence in the knowledge industry

2– Information and Communication Technologies

- a. Communication networks and electronic documents
- b. e-Business and Business Platforms for Digital Publishing

3– e-Learning and Virtual Libraries

- a. Spaces of information for distance teaching and learning platforms
- b. Virtual libraries, resource mapping, and multimedia for teaching

4– Informational and technological watch

- a. Concepts, processes and actions in the watch and collaborative technology
- b. e-Watch, identification of sources and development of resources

5– Collective Intelligence and Media

- a. Media and measures of the collective performance in the knowledge economy
- b. Management of collective intelligence and knowledge communitarization

6– Digitalization, Archives and Management of Cultural Patrimony
